SAVE OUR BLUE

Nature of interval of several hundred million years brought up was polluted only at half a century. Man doesn't know the regaining method. What lost as compensation for development that spends money and technology. In the blue sky, it is cloudy in the gray, polluted tears, are thrown. Human doesn't notice the warning constantly shot by the change in the sky gradation for human. No, it pretends not to notice and corruption and the loss are repeated.

Stop Rokkasho
